

EDUCATION

ARKA JAIN UNIVERSITY B.Tech In Computer Science And Engineering CGPA:8.07	Jamshedpur, Jharkhand, India 2023-2027
MotilalNehruPublicSchool 11th and 12th Grades CISCE BOARD Percentage: 73.1%	Jamshedpur, Jharkhand, India 2021-2023

TECHNICAL SKILLS

- **ProgrammingLanguages:** C/C++, Python, Java
- **Tools & Technologies:** Git, GitHub, Excel
- **Frameworks:** TensorFlow, Scikit-learn, Pandas, Numpy, Matplotlib
- **Platforms:** Jupyter Notebook, Visual Studio Code, Google Collab
- **Key CoursesTaken:** Software Engineering, Data Structures and Algorithms, Cloud Fundamentals etc.

WORK EXPERIENCE

DATA SCIENCE INTERN AISwift Solutions • Developed a House price prediction model using machine learning techniques. • Implemented feature engineering, model training, and evaluation to enhance prediction accuracy. • Conducted data analysis and visualization to interpret results and improve model performance. • Demonstrated strong technical skills and problem-solving abilities, earning an extension of the internship after passing a performance-based interview.	July 2024 – August 2024
DATA ANALYTICS INTERN Paul Infotech Solutions • Developed PaisaPanel, a finance management web application using Streamlit and SQLite to manage and categorize personal financial transactions. • Implemented secure user authentication features including registration, login, and password reset functionality. • Integrated interactive data visualizations such as bar and pie charts using Plotly Express to analyze spending patterns and financial trends. • Demonstrated strong skills in Python development, database integration, and data visualization while solving real-world financial tracking problems.	June 2025 – August 2025
GRAPHIC DESIGNER & SOCIAL MEDIA HEAD TaxBunny, Ranchi • Designed creative social media posts, banners, and marketing materials to enhance brand visibility and maintain a consistent visual identity. • Managed and maintained company social media platforms, planned content calendars, and scheduled posts to improve audience engagement. • Analyzed social media performance and audience response to optimize content strategy and improve campaign effectiveness. • Collaborated with marketing and management teams to develop promotional campaigns and deliver high-quality digital content on time.	January 2025 – July 2025

PROJECTS

AI-Powered Chatbot using IBM Watson Assistant • Developed an AI-powered chatbot using IBM Watson Assistant hosted on IBM Cloud. The chatbot is designed to engage with users by understanding natural language and providing intelligent responses. It uses Watson Assistant's NLP capabilities to recognize intents and entities, offering personalized interactions based on user input. The chatbot is deployed on IBM Cloud App Platform, providing a seamless web interface for user communication.
Paisa Panal Using Python and Streamlit • Developed PaisaPanel, a personal finance management web application using Streamlit with SQLite for secure data storage. Implemented user authentication, transaction categorization, and password reset features. Integrated interactive dashboards using Plotly Express to visualize spending patterns, enabling users to track expenses effectively and gain insights into their financial behavior through clear analytics.

OTHERS

Problem-SolvingAchievements: Solved 100+ coding problems on GeeksforGeeks and 200+ coding problems on LeetCode
Soft Skills: Problem Solving,Critical Thinking, Communication, Teamwork, Creativity
Languages: English and Hindi
